

Bund Colony Visit

A team from the department visited the above residential areas with a view to get a first- hand knowledge of the educational facilities available to children living there. The visits and discussions with the parents, social service volunteers and children were facilitated by the representatives of the N.G.O.: “Global Vision”.

The visiting team wanted to make further visits to similar locations before firming up plans to assist deserving children, and identifying requirements like coaching classes in computer related subjects.
