Parodos 2023

Principal's Message

The classes for the new academic year 2023-2024 have just begun. M.Tech classes started on 04th September. Ceremonial commencement of the new undergraduate

batch of the 2023 admission is scheduled to be held on Saturday, 9 September. This time, we have invited key senior officials from industries as Guests of Honour. Their presence enunciates the stronger linkage with the industries that we are trying to build. We have introduced the new curriculum for both PG and UG in which the internship is becoming part of the academic process rather than being given as add-ons. In the case of UG, if a student earns the credits of the final Semester by crediting MOOC courses in advance from the third year onwards, they will be able to spend one full Semester in the Industry. They can take Industry relevant projects also. We embark on such innovations to make our students ready for job from day one. We will be able to reap the full benefit only if all students imbibe that spirit of learning from the beginning of their studies itself. It is in this context that we seek the help of the Parents and our stakeholders. We find that the parental role is very pivotal in bringing up the students and moulding their character. Next comes the Faculty. Parent can act in tandem with the Faculty in nurturing the students. We look forward to having even more vibrant associations with our stakeholders including parents in the current year.

Best wishes for all the newly admitted students of the current year.
