PRINCIPAL'S MESSAGE

The word 'Harmony' has different interpretations depending on the context to which it is being applied. It could mean a musical sound made by different notes being played or sung at the same time, together giving a pleasant experience or from a social context, a scenario where people understand and agree with each other and live together happily and peacefully. Harmony in art is the use of similar or related elements to create a visually satisfying effect. In general, harmony could be a state of togetherness or integration that results in a better being. Communal Harmony week is being celebrated in India from 19 to 25 November to promote communal harmony and integration. By practicing harmony in both our individual lives and in our communities as well as with the environment, we will be able to achieve a more balanced existence for all and create a unified whole from the diverse elements. That will help us truly enjoy 'Unity in Diversity'.

Dr. S. Viswanatha Rao
