

INSTITUTIONAL DISTINCTIVENESS

The institution has adopted an infrastructural policy which does not cause disturbance to the landscape and the terrain. The natural flow of water is not hindered. Classrooms are properly ventilated allowing the flow and circulation of quality air in the classrooms. The campus is well maintained with natural flora and fauna along with terrain and birds' friendly campus. Campus has won National award for Green Initiatives. Periodic maintenance of the building and daily housekeeping of the campus have contributed to the status as clean campus. The various cells namely waste management cell, Energy cell, water management cell under the umbrella of Environment cell takes care of regular initiatives to maintain ecofriendly campus in addition to nature club activities. Rainwater harvesting in campus and water recycling in hostel helps farming in water management towards sustainable water resource management also catering to nearby institutions. The Rainwater in the campus is collected and three stage filtering is successfully implemented making it usable for campus needs. The campus also conducts regularly green audits through which suggestions from students are collected and implemented for maintaining the eco-friendly initiatives in the campus for more than a decade. The campus as also recently won the Gold rating from Sustainable Institutions of India by R-world.
