MAR BASELIOS COLLEGE OF ENGINEERING AND TECHNOLOGY

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

B.TECH DEGREE PROGRAMME

IN

COMPUTER SCIENCE AND ENGINEERING (Artificial Intelligence)

CURRICULUM AND FIRST YEAR SYLLABI

2023 SCHEME

Items	Board of Studies (BOS)	Academic Council (AC)
Date of Approval	10/7/2023	09/08/2023

Head of the Department

Chairman, Board of Studies

Principal

Chairman, Academic Council

Curriculum Approved by BoS on 10/7/23 and Academic Council on 9/8/23

MAR BASELIOS COLLEGE OF ENGINEERING AND TECHNOLOGY

Vision and Mission of the Institution

Vision:
To be an Institution moulding globally competent professionals as epitomes of Noble Values.

Mission:
To transform the Youth as technically competent, ethically sound and socially committed professionals, by providing a vibrant learning ambience for the welfare of humanity.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Vision and Mission of the Department

Vision:
To be a Centre of Excellence in Computer Science and Engineering providing quality education and researchfor the betterment of the society.

Mission:
To impart sound knowledge in theoretical and applied foundations of Computer Science and Engineering, andto train the students to solve real life issues to effectively define and shape life.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Graduates will be successful professionals in Industries of core or interdisciplinary nature or entrepreneurs, demonstrating effective leadership and excellent team work.

PEO2: Graduates will expand the horizon of knowledge through higher education or research,leading to self-directed professional development

PEO3: Graduates will demonstrate competency in AI & ML, professional attitude and ethics whileproviding solutions in societal and environmental contexts

PROGRAMME OUTCOMES (POs)

Engineering graduates will be able to:

1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineeringproblems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public healthand safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive

clear instructions.

11. **Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independentand life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1: To apply Algorithmic Principles, Programming Skills and Software Engineering Principles to design, develop and evaluate Software Systems of varying complexities.

PSO2: To apply knowledge of System Integration to design and implement computer-based systems

PSO3: To solve real world and socially relevant problems using AI

Curriculum Approved by BoS on 10/7/23 and Academic Council on 9/8/23

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

B.TECH COMPUTER SCIENCE AND ENGINEERING (Artificial Intelligence)

For the students admitted from 2023

Scheduling of Courses

i) Knowledge Segments and Credits

Every course of B. Tech Programme is placed in one of the nine categories as listed in the following table.

No semester shall have more than six lecture-based courses and two laboratory courses,

and/or drawing/seminar/project courses in the curriculum.

Sl. No.	Category	Category Code	2023
1	Humanities and Social Sciences including Management Courses	HSC	6
2	Basic Science Courses	BSC	26
3	Engineering Science Courses	ESC	24
4	Programme Core Courses, Comprehensive Course Work and Viva Voce	PCC	72
5	Programme Elective Courses	PEC	18
6	Institute Elective Courses	IEC	6
7	Project Work and Seminar	PWS	15
8	Professional Development Courses	PDC	--
9	Mandatory Student Activities (P/F)	MSA	3
	Total Mandatory Credits		**170**
	Value Added Courses (Optional) – Honours/Minor		15

ii) Semester-wise Credit Distribution

Semester	I	II	III	IV	V	VI	VII	VIII	Total Credits
Credits for Courses	19	21	23	22	25	23	20	14	**167**
	40		45		48		34		**167**

Curriculum Approved by BoS on 10/7/23 and Academic Council on 9/8/23

			SEMESTER I

SEMESTER I

Syllabus-B Tech S1

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23MAL10A	LINEAR ALGEBRA AND CALCULUS	BSC	3	1	0	0	4	2023

i) COURSE OVERVIEW:

This course introduces students to some basic mathematical ideas and tools which are at the core of any engineering course. A brief course in Linear Algebra familiarizes students with some basic techniques in matrix theory which are essential for analyzing linear systems. The calculus of functions of one or more variables taught in this course are useful in modelling andanalyzing physical phenomena involving continuous change of variables or parameters and have applications across all branches of engineering.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Solve systems of linear equations.	Apply
CO 2	Compute maxima and minima using partial derivatives.	Apply
CO 3	Compute areas and volumes of geometrical shapes using multiple integrals.	Apply
CO 4	Identify the convergence or divergence of an infinite series.	Apply
CO 5	Determine the Taylor and Fourier series expansion of functions and learn their applications.	Apply

iii) SYLLABUS

Basics of Linear Algebra – Solution of systems of linear equations, row echelon form, rank, eigen values and eigen vectors, diagonalization of matrices, orthogonal transformation, quadratic forms.

Partial Differentiation and Applications – Limit and continuity of functions of two or more variables, partial derivatives, chain rule, total derivatives, maxima and minima

.

Multiple Integrals – Double and triple integrals, double integrals over rectangular and non- rectangular regions, changing the order of integration, finding areas and volume, mass and center of gravity.

Infinite series – Convergence and divergence of Infinite series, geometric series and p-series, test of convergence, Alternating series, absolute and conditional convergence

Taylor series, Binomial series and series representation of exponential, trigonometric, logarithmic functions –Fourier Series– Euler's formulas, Fourier sine and cosine series, Half range expansions

iv)   a) TEXT BOOKS

1. H. Anton, I. Biven, S. Davis, "Calculus", Wiley, 10th Edition, 2015.

2. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, John Wiley & Sons, 2016.

b) REFERENCES

1. J. Stewart, Essential Calculus, Cengage, 2nd Edition, 2017

2. G.B. Thomas and R.L. Finney, Calculus and Analytic geometry, 9th Edition, Pearson, Reprint, 2002.
3. Peter V. O'Neil, Advanced Engineering Mathematics, Cengage, 7th Edition 2012.

v)   CONTINUOUS ASSESSMENT

Attendance	**5 marks**
CA Exams (2 numbers)	**10 marks each**
Assignment	**15 marks**
Total	**40 Marks**

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 60 marks with a duration of 3 hours.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23PYL10A	ENGINEERING PHYSICS (FOR ALL BRANCHES)	BSC	3	1	0	0	4	2023

i) **COURSE OVERVIEW**: The aim of the course is to develop scientific attitude in students and offer them an understanding of physical concepts behind various engineering applications. It creates an urge in students to think creatively in emerging areas of Physics.

ii) **COURSE OUTCOMES**

After the completion of the course, the student will be able to:

CO 1	Describe the characteristics of different types of oscillations and waves.	Understand
CO 2	Explain natural physical processes and related technological advances using principles of optics	Understand
CO 3	Generalise the principles of quantum mechanics to explain the behavior of matter in the atomic and subatomic level	Understand
CO 4	Describe the fundamentals of lasers and the principles behind various solid state lighting devices and fiber optic communication system.	Understand
CO 5	Explain the fundamental ideas of Ultrasonics and acoustics in order to facilitate technological advancement.	Understand

iii) **SYLLABUS**

Oscillations and Waves: Harmonic oscillations – Damped harmonic oscillations, Forced harmonic oscillations, Q- factor, Amplitude resonance, comparison of electrical and mechanical oscillator. Wave motion – Longitudinal waves and Transverse waves, One dimensional wave equation and solution, three-dimensional wave equations, Transverse vibrations along a stretched string.

Wave Optics : Interference of light – Cosine law, Wedge shaped films - Air wedge, Newton's rings, Antireflection coating. Diffraction- comparison of Fresnel and Fraunhoferdiffraction, Fraunhofer diffraction due to double slit, grating equation, Rayleigh's criterion, resolving power and dispersive power of grating.

Quantum Mechanics & Nano technology: Wave function, Uncertainty principle, Time dependent and time independent Schrodinger wave equations, Applications of Schrodingerwave equation - particle in one-dimensional potential well, quantum mechanical tunneling. Introduction to nanoscience and technology, significance of surface to volume ratio, Quantum confinement, Characterization techniques – XRD,

UV-Visible Spectroscopy, Applications of nanomaterials.

Laser and Photonics: Principles of Laser, Properties of laser, Ruby laser and Helium neon laser, Applications of Laser. Holography-construction of hologram, reconstruction of hologram, Applications. Introduction to photonics - photonic devices - Light Emitting Diode, Solar cells, Optical fiber – Principle of OFC, Numerical aperture, Types of fibers – step index fiber, Graded index fiber, Fiber Optic Communication System, Applicationsof Optical fiber, Fibre optic sensors.

Acoustics & Ultrasonic: Acoustics - characteristics of musical sounds, absorption coefficient, reverberation time- Sabine's formula (no derivation), significance, factors affecting architectural acoustics and their remedies.

Ultrasonics - production by magnetostriction oscillator and piezoelectric oscillator, detection of ultrasonic waves - thermal and piezoelectric methods, ultrasonic diffractometer-, applications of ultrasonic waves -SONAR, NDT, medical applications.

iv)   a) **TEXT BOOKS**

1) M.N. Avadhanulu , P.G. Kshirsagar, T.V.S Arun Murthy*, A Text book of Engineering Physics*, S. Chand &Co., Revised Edition, 2014

2) H.K. Malik, A.K. Singh, *Engineering Physics,* McGraw Hill Education, 2nd Edition,2017

b) **REFERENCES**

1) Arthur Beiser, *Concepts of Modern Physics*, Tata McGraw Hill Publications,6thEdition, 2003.

2) Aruldhas G., *Engineering Physics*, Prentice Hall of India Pvt Ltd., 2015

3) Ajoy Ghatak, *Optics*, Mc Graw Hill Education, 6th Edition, 2017

4) David J. Griffiths, *Introduction to Electrodynamics*, Addison-Wesley publishing, 4thEdition, 1999.

5) Choudhary, Nityanand, K. R. Deepak, S. H. Abdi, *Perspective of Engineering: Physics:I,* Acme Learning Pvt Ltd, first edition :2009.

6) A. S. Vasudeva, *A Text Book of Engineering Physics*, S. Chand &Co., first edition:2008.

7) Premlet B., *Advanced Engineering Physics*, Phasor Books,10thEdition, 2017.

v)   CONTINUOUS ASSESSMENT

Attendance	:	5 marks
CA Exams (2 numbers)	:	10 marks each
Assignment	:	15 marks
Total	:	40 Marks

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 60 marks with a duration of 3 hours.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESB10E	PROGRAMMING IN C	ESC	2	1	2	0	4	2023

i) COURSE OVERVIEW:

This course aims to introduce the concepts of structured programming. It covers basic concepts of C programming language including arrays, functions, pointers and files. This course involves a lab component which equips the learner to solve computational problems through programming.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Explain the fundamentals of computer architecture and types of software.	Understand
CO 2	Develop a solution using algorithm /flowchart to a computational problem.	Apply
CO 3	Construct programs with control statements and arrays.	Apply
CO4	Make use of user defined data types or functions to solve computational problems.	Apply
CO5	Develop programs using files and pointers.	Apply

iii) SYLLABUS

Computer architecture & Programming Languages Basics of Computer architecture, Types of Programming Languages, System Software, Application Software, Introduction to structured programming, Algorithms, Flowcharts and Pseudo-codes C Programming Language Data Types, variables, keywords, Constants, Operatorsand Expressions, Control Flow Statements- Conditional statements, Iterativestatements, programs

Arrays and Strings Multidimensional arrays and matrices, String processing, searching and sorting in 1D array.

Functions Scope of variable, Pass by reference and value methods, Recursive functions. Structures and union, Storage Classes

Pointers and Files- File Operations, Sequential access and random access, programs covering pointers and files, Introduction to data structures Types of data structure, singly linked list.

iv)   **a) TEXT BOOKS**

1) Byron Gottfried, *Programming with C* (Schaum's Outlines Series), McgrawHill Education, 3rd Edition, 2017.
2) H. M. Deitel, P. J. Deitel, *C: How to program*, 7th Edition, Pearson Education, 2010.
3) Anita Goel, Computer Fundamentals, Pearson, 1st Edition, 2010.
4) Ellis Horowits, SartajSahini, Susan Anderson Freed, *Fundamentals of Data Structure in C*, 2nd Edition, 2008.

b) REFERENCES

1) Brian W. Kernighan and Dennis M. Ritchie, *C Programming Language*,Pearson, 2ndEdition, 2015.
2) Rajaraman V, PHI, *Computer Basics and Programming in C*, 1st Edition, 2007.
3) Anita Goel and Ajay Mittal, *Computer fundamentals and Programming in C*, 1stEdition,2013.

v)   **CONTINOUS ASSESMENT**

Attendance	5 marks
CA Exams (CAT1 and CAT2)	10 marks each
Assignment	15 marks
Lab work	10
Lab exam	10
Total	**60 Marks**

vi)   **END SEMESTER EXAMINATIONS**

There will be an end semester examination for 40 marks with a duration of 2 hours.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESL10J	BASICS OF ELECTRICAL ENGINEERING (Fractal Course) A	ESC	2	0	0	0	2	2023

i) COURSE OVERVIEW

This course aims to equip the students with an understanding of the fundamental principles

of electrical engineering.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Apply fundamental circuit laws and principles of electromagnetism to solve simple DC electric circuits and magnetic circuits respectively.	Apply
CO 2	Solve simple AC circuits using the alternating current fundamentals.	Apply
CO 3	Explain the principle of operation and characteristics of DC Motors	Understand

iii) SYLLABUS

Basic concepts of DC circuits: Ohm's Law and Kirchhoff's laws, Star-delta conversion, Analysis of DC circuits, Mesh analysis, Node analysis.

Magnetic Circuits: Basic Terminology, Simple Magnetic circuits, Electromagnetic Induction, Faraday's laws, Lenz's law, Self-inductance and mutual inductance.

Alternating Current fundamentals: Basic definitions, Average, RMS values, AC Circuits, Phasor representation, Analysis of simple AC circuits (R, L, C, RL, RC, RLC Series circuits)

Three phase AC systems, Generation of three phase voltages, star and delta connections.

DC Motors-Constructional details of DC machines, Principle of operation, Back EMF, Torque equation, Types, Performance characteristics, Applications

iv) a) TEXT BOOKS

1) William H. Hayt., Jr., Jack E. Kemmerly, Steven M. Durbin., *Engineering CircuitAnalysis*, McGraw-Hill, 8th Edition, 2012.
2) Kothari D. P. and Nagrath I. J., *Basic Electrical Engineering*, Tata McGraw Hill,2010.
3) Fitzgerald A.E., David Higginbotham E., Arvin Grabel, *Basic Electrical Engineering*,Tata McGraw Hill, 5th Edition,2009.
4) Bimbra P. S., *Electric Machines*, Khanna Publishers, 2nd Edition, 2017.

b) REFERENCES

1) Paul Breeze, *Power Generation Technologies,* Newnes,3rd Edition, 2019.
2) Allan Hambley R., *Electrical Engineering: Principles & Applications*, Pearson Education,7th Edition, 2018.

1) Mittle V. N. and Arvind Mittal, *Basic Electrical Engineering*, McGraw Hill,2ndEdition, 2006.
2) Clayton A. E. and Hancock N. N., *The Performance and Design of Direct CurrentMachines*, CBS Publishers & Distributors, New Delhi, 3rd Edition, 2004.

v) CONTINUOUS ASSESSMENT

Attendance	5 marks
CA Exams (2 numbers)	10 marks each
Assignment	15 marks
Total	**40 Marks**

vi) END SEMESTER EXAMINATIONS

There will be an end semester examination for 60 marks with a duration of 3 hours.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESL10L	BASICS OF ELECTRONICS ENGINEERING (FractalCourse)	ESC	2	0	0	0	2	2023

i) **COURSE OVERVIEW**

This course aims to equip the students with an understanding of the fundamental principlesof electronics and communication engineering.

ii) **COURSE OUTCOMES**

After the completion of the course, the student will be able to:

CO1	Describe the principles of semiconductor devices, its characteristics and various electronic circuits	Understand
CO2	Explain the basic working of Op-Amp, logic gates, radio and cellular communication systems.	Understand

iii) **SYLLABUS**

PN Junction diode: Principle of operation, V-I characteristics, breakdown mechanisms, Zenerdiode and its characteristics. Rectifiers and Power supplies: Block diagram of a dc power supply, working of a full wave bridge rectifier, capacitor filter (no analysis), working of simple Zener voltage regulator. Bipolar Junction Transistors: structure, principle of operation, relation between current gains in Common Emitter (CE), Common Base (CB) and Common Collector (CC) configurations, input and output characteristics of CE configuration. Amplifiers: Concept of voltage divider biasing, circuit diagram and working of CE (RC coupled) amplifier with its frequency response. Integrated Circuits: Analog IC; Operational Amplifier, block diagram, ideal characteristics, inverting and non-inverting Amplifier. Digital IC: Logic Gates AND, OR, NOT, Universal Gates; truth table, De-Morgans law, Realization of simple Boolean functions.Radio communication: Modulation, need for modulation, Principle of AM, mathematical expression, waveform, frequency spectrum and bandwidth of AM, Principle of FM, mathematical expression, waveform. Radio Receivers: block diagram

of super heterodyne receiver (AM&FM). Mobile communication: Basic principles of cellular communications, concept of cells, frequency reuse, hand off.

iv)   **a) TEXT BOOKS**

1) Boylested, R. L. and Nashelsky, L*., Electronic Devices and Circuit Theory*, PearsonEducation, 10[th]Edition, 2009.
2) Thomas l Floyd, *Digital Fundamentals,* Pearson Education, 11[th]Edition, 2018.
3) Ramakant A Gaykwad, *Op-Amps and Linear Integrated Circuits*, Pearson Education,4[th]Edition, 2015.
4) Wayne Tomasi and Neil Storey, *A Textbook on Basic Communication andInformation Engineering*, Pearson, 5[th]Edition, 2010.

b) REFERENCES

1) N.N. Bhargava , D.C. Kulshreshtha , S.C. Gupta, *Basic Electronics and LinearCircuits*, Tata McGraw - Hill Education, New Delhi, 2nd Edition, 2014.

v)   **CONTINUOUS ASSESSMENT EVALUATION PATTERN**

Attendance	5 marks
CA Exams (2 numbers)	10 marks each
Assignment	15 marks
Total	**40 Marks**

vi)   **END SEMESTER EXAMINATIONS**

There will be an end semester examination for 60 marks with a duration of 3 hours.

Course Code	Course Name	Category	L	T	P	J	Credit
23ESL1NA	ENVIRONMENTAL SCIENCE	ESC	2	0	0	0	1

i) COURSE OVERVIEW

Goal of this course is to expose students to the significance of natural resource management, ecosystem restoration and biodiversity conservation. The course details the various problems related to environmental pollution and the legal provisions for environmental protection. The course also introduces the concept of sustainability, sustainable practices and the role of engineering in attaining sustainable development.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Identify the problems associated with the overutilization of natural resources and the role of engineers in natural resource management.	Apply
CO 2	Explain the concepts related to the ecosystem and the significance of ecosystem restoration and biodiversity conservation.	Understand
CO 3	Explain the causes, impacts and control measures of various types of environmental pollution.	Understand
CO 4	Summarize the various legal provisions for environmental protection.	Understand
CO 5	Discuss the concepts of sustainability and sustainable practices by utilizing engineering knowledge and principles.	Apply

iii) SYLLABUS

Interdisciplinary nature of environmental science: Scope and importance

Natural resources and associated problems: Water resources, Energy resources, Food resources, Land resources

Ecosystems: Concept, Types, Functions, Productivity, Energy flow and Food chains of ecosystems. Characteristic features and functions of Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystem, Ecosystem Services

Biodiversity and its conservation: Species and ecosystem diversity, Value of biodiversity, Hotspots of biodiversity, Threats to biodiversity, Conservation of biodiversity

Environmental Pollution: Air, Water and Soil pollution. Solid and Hazardous Waste Management, Role of individuals in prevention of pollution

Social issues and the environment: Environmental ethics, Contemporary Environmental issues, Water conservation- rainwater harvesting, watershed management, conservation of wetlands, Legal provisions for environmental protection

Sustainability: Concept, Sustainable Development Goals. Sustainability Practices- Green Engineering, Sustainable habitat- Green buildings, Sustainable Urbanization, Industrial Ecology, Circular Economy- Case studies

iv) a)   TEXTBOOKS
1) Erach Bharucha, Textbook for Environmental Studies, 3rd edition, UGC, New Delhi, 2021.
2) D. D. Mishra, Fundamental Concepts in Environmental Studies, 4th edition, S. Chand & Co. Ltd., 2014.
3) Kurian Joseph and R. Nagendran, Essentials of Environmental Studies, Pearson Education Pvt. Ltd, India, 2017.
4) David Allen and David R. Shonnard, Sustainable Engineering: Concepts, Design and Case Studies, 1st edition, Pearson, 2011.

v) REFERENCES
vi) Suresh K. Dhameja, Environmental Engineering and Management, 4th edition, S.K. **Kataria** & Sons, 2021.
1) Bradley Striebig, Adebayo A. Ogundipe and Maria Papadakis, Engineering Applications in Sustainable Design and Development, 1st edition, Cengage Learning, EMEA, 2015.

vii) COURSE   PLAN

Module	Contents	No. of hours
I	Interdisciplinary nature of Environment: Definition, scope and importance. Natural resources and associated problems: Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water. Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources (case studies). Food Resources: effects of modern agriculture, fertilizers- pesticides problems, water logging, salinity. Land resources: land degradation, man induced landslides, soil erosion and desertification. Role of individuals in conservation of natural resources, Equitable use of resources.	**6**
II	Ecosystems**:** Concept of an ecosystem, Structure and function of an ecosystem. Productivity, Energy flow in the ecosystems. Ecological succession. Food chains, food webs and ecological pyramids. Introduction, Types of ecosystems, Characteristic features and function of the following ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystem, Ecosystem services. Biodiversity and its Conservation: Introduction-Definition: species and ecosystem diversity. Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic values. Hotspots of biodiversity, Threats to biodiversity: habitat loss, poaching of wildlife, man wildlife conflicts. Endangered and endemic species of India. Conservation of biodiversity.	**6**

III	Environmental Pollution: Definition, Causes, effects and control measures of: Air pollution, Water pollution, Soil pollution, Noise pollution. Solid and Hazardous waste management: Causes, effects and control measures of urban and industrial wastes. 3R concept, Zero waste management -case studies. Role of an individual in prevention of pollution.	6
IV	Social issues and the Environment: Environmental ethics, Contemporary Environmental issues- Global warming, Climate change, Sea level rise. International efforts for environmental protection. Water conservation - rain water harvesting, watershed management, conservation of wetlands- Ramsar sites in India. Legal provisions for environmental protection. Environment protection Act, Air (prevention and control of pollution) Act, Water (prevention and control of pollution) Act, Wildlife protection act, Forest conservation act. National Action Plan on Climate Change	6
V	Sustainability: Introduction, Need and concept of sustainability, Evolution of sustainability, Social, Environmental and Economic sustainability. Sustainable development, Nexus between technology and sustainable development, Challenges for sustainable development, Sustainable Development Goals Sustainability Practices- Green engineering, Sustainable habitat-basic concepts, Green buildings, Green materials for building constructions, Green building certification, Methods of increasing the energy efficiency of buildings, Sustainable Urbanisation, Industrial Ecology, Circular Economy- Case studies.	6
	Total hours	**30**

V) CONTINUOUS ASSESSMENT

Attendance	: 5 marks	
Assignment (Activity based)	: 15 marks	
Course based tasks		
(i) Mini Project	: 30 marks	
(ii) Case Study	: 20 marks	
CAT (one exam at the end of semester)	: 30 marks, 1.5 hrs duration	
Total	**: 100 marks**	

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23PYP10A	ENGINEERING PHYSICS LAB	BSC	0	0	2	0	1	2023

i) COURSE OVERVIEW:

The aim of this course is to enable the students to gain practical knowledge in Physics to correlate with the theoretical studies. It equips the students to utilize the acquired skills in an appropriate way to explore the prospects of modern technology. It brings more confidence in students and develop the ability to fabricate engineering and technical tools.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Determine the frequency of tuning fork using a Melde's string apparatus by setting up wave pattern in a stretched string.	Apply
CO 2	Determine the Numerical aperture and acceptance angle of opticalfiber.	Apply
CO 3	Determine the wavelength of a monochromatic beam of light and thickness of thin wire using principle of interference	Apply
CO 4	Demonstrate diffraction of light using plane transmission grating.	Apply
CO 5	Draw the I-V characteristics of non ohmic devices.	Apply

iii) SYLLABUS

1) Melde's string apparatus- Measurement of frequency in the transverse mode.
2) Wavelength measurement of a monochromatic source of light using Newton's Ringsmethod.
3) Determination of diameter of a thin wire or thickness of a thin strip of paper using airwedge method.
4) Measurement of wavelength of a source of light using grating.
5) Determination of dispersive power and resolving power of a plane transmission grating.
6) Determination of the wavelength of any standard laser using diffraction grating
7) I-V characteristics of solar cell.
8) To measure the Numerical aperture and acceptance angle of an optical fibre

Nil

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESP10B	ELECTRICAL AND ELECTRONICS WORKSHOP	ESC	0	0	2	0	1	2023

i) COURSE OVERVIEW:

To expose the students to the commonly used accessories and components in electrical installations and to provide hands on experience of wiring of electrical circuits.

To enable the students to familiarize, identify, construct, and debug the electronic components, devices and circuits. It also enables the student's engineering skills by soldering practices of electronic circuits

ii)   COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Choose the appropriate tools, electrical accessories, protective elements for electrical wiring and study the different types of earthling and safety measures.	Remember
CO 2	Build a simple lighting circuit for domestic buildings using suitable accessories and materials.	Apply
CO 3	Identify the faults in electric circuits and batteries using appropriate devices.	Analysis
CO 4	Make use of a solar powered circuit and obtain its VI characteristics.	Apply
CO 5	Construct the performance characteristics of DC Motors by performing load test.	Apply
CO 6	Test various electronic components.	Understand
CO 7	Implement basic electronic circuits on breadboard.	Apply
CO 8	Implement basic electronic circuits on general purpose PCB.	Apply

iii)   SYLLABUS

Familiarization/Identification of electrical accessories and protective elements, wiring of circuits using PVC conduits, wiring of simple solar chargeable circuit and determination of its characteristics, Demonstration of power distribution arrangement and earthling schemes, Identification of different types of batteries.

Familiarization of electronic equipment and commonly used tools, Familiarization and testing of electronic components, Interconnection using bread board, Diode Characteristics, Single stage RC coupled Amplifier, Truth table verification of Logic Gates, Soldering Practice, DC Power Supply, Inverting and Non Inverting amplifier using Op-amp.

SEMESTER II

Syllabus-BTech S2

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23MAL10B	VECTOR CALCULUS, DIFFERENTIAL EQUATIONS AND TRANSFORMS	BSC	3	1	0	0	4	2023

i) COURSE OVERVIEW:

The objective of this course is to familiarize the prospective engineers with some advanced concepts and methods in Mathematics which include the Calculus of vector valued functions, ordinary differential equations and basic transforms such as Laplace and Fourier Transforms which are invaluable for any engineer's mathematical tool box. The topics treated in this coursehave applications in all branches of engineering.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Compute the derivatives and line integrals of vector functions and learn their applications.	Apply
CO 2	Evaluate surface and volume integrals and learn their inter-relations and applications.	Apply
CO 3	Solve linear ordinary differential equations.	Apply
CO 4	Apply Laplace transform to solve ODEs arising in engineering.	Apply
CO 5	Apply Fourier transforms of functions to solve problems arising in engineering.	Apply

iii) SYLLABUS

Vector Calculus – Derivative of vector function, Gradient, Divergence, Curl, Line integral,conservative fields, Green's theorem, surface integral, Gauss divergence theorem, Stokes'theorem.

Ordinary Differential Equations – Homogeneous and Non-Homogeneous linear differential Equations, Euler-Cauchy equations. Method of undetermined coefficients and Method of variation of parameters.

Laplace transforms – Laplace Transform and its inverse , shifting theorems, Laplace transformof derivatives and integrals, solution of differential equations using Laplace transform, Unit step function. Dirac delta function. Convolution theorem and its applications

Fourier Transforms – Fourier integral representation, Fourier sine and cosine integrals. Fouriertransform and inverse Fourier transform. Fourier sine and cosine transforms, inverse sine and cosine transform. Convolution theorem

v) **CONTINUOUS ASSESSMENT**

Attendance	5 marks
CA Exams (2 numbers)	10 marks each
Assignment	15 marks
Total	**40 Marks**

vi) **END SEMESTER EXAMINATIONS**

There will be an end semester examination for 60 marks with a duration of 3 hours.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23CYL10A	ENGINEERING CHEMISTRY (FOR ALL BRANCHES)	BSC	3	1	0	**0**	4	2023

i) **COURSE OVERVIEW**: The aim of the Engineering Chemistry program is to expose the students to basic concepts of chemistry and its Industrial as well as Engineering applications.It also let the students to familiarize with different topics such as new-generation engineering materials, storage devices, different instrumental methods etc.

ii) **COURSE OUTCOMES**

After the completion of the course, the student will be able to:

CO1	Apply the basic concepts of Electrochemistry in various Engineering problems.	Apply
CO2	Apply the basic concepts of UV-Visible, IR and NMR spectroscopic techniques to analyze organic compounds.	Apply
CO3	Explain the significance of conducting polymers, Nanomaterials, Alloys and composite materials in Engineering.	Understand
CO4	Explain relevant techniques used for the identification and separation of chemical compounds and mixtures.	Understand
CO5	Explain the principles of Green chemistry and various water treatment methods used for sustainability.	Understand

iii) **SYLLABUS**

Electrochemistry: Cell prototype- Daniel cell, Nernst equation and its uses, Primary and secondary electrodes- construction and working, applications of electrochemical series. Potentiometric titration – Acid Base titration, Fundamentals of corrosion, Galvanic series, Wetand dry corrosion – types, mechanism and its prevention.

Electrochemical power sources: different types of cells, construction, working and applications– Dry cell, Electrolytic cells, Galvanic cells, Lead-acid cell, accumulator, Lithium ion cell- different electrode materials, Fuel cells, H_2-O_2 fuel cell.

Basics of Spectroscopy: Beer Lambert's law, Principles and applications of UV-Visible spectroscopy, Fluorescence and its applications, Woodward-Feiser rule, instrumentation of UV- Visible spectroscope, colorimetry, Principles and applications of IR spectroscopy, Number of vibrational modes – CO_2 and H_2O, Determination of force constant of diatomic molecules, Principles and applications of NMR spectroscopy, Shielding, Deshielding, Chemical shift, spin- spin splitting, MRI technique.

Engineering Materials: Basics of Polymer chemistry, Types of copolymers, Preparation, properties and applications- Butadiene Styrene, Acrylonitrile Butadiene Styrene, Kevlar, conducting polymers- Polyaniline and Polypyrrole - preparation

properties and applications, Organic Light Emitting Diode

Nanomaterials: Origin of nanomaterials, Classifications, Chemical synthesis-hydrolysis and reduction, Carbon Nano Tubes, Graphene, Quantum dots-applications.

Alloys and Composites: Cast iron, Principal non-ferrous alloys, need, properties and applications of composites, super alloys, Ceramics- structure and applications.

Instrumental methods in chemistry: Thermal methods, Thermo Gravimetric Analysis, Differential Thermal Analysis, Chromatography techniques- Thin Layer Chromatography, Column Chromatography, Gas Chromatography, High Performance Liquid Chromatography, Surface characterization using Scanning Electron Microscopy (SEM), X-ray Photoelectron Spectroscopy(XPS), Auger Electron Spectroscopy(AES).

Green Chemistry and Sustainability: Green chemistry – Principles, Matrices to express greenness- E-Factor, Atom Economy, Environmental Quotient, Green chemistry and Catalysis, R4M4 Models-Econoburette, Survismeter, E-waste disposal, Life Cycle Analysis, Benefits and limitations of conducting Life Cycle Analysis.

Water Technology: Water characteristics, hardness, disadvantages of hard water, Estimation of hardness- EDTA method, Ion exchange process for water softening, Dissolved Oxygen, Biological Oxygen Demand and Chemical Oxygen Demand, its estimation and significance, Municipal water treatment, disinfection of water, Reverse Osmosis, Sewage water treatment.

v) CONTINUOUS ASSESSMENT

Attendance	5 marks
CA Exams (2 numbers)	10 marks each
Assignment	15 marks
Total	**40 Marks**

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 60 marks with a duration of 3 hours.

.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESB10A	ENGINEERING GRAPHICS	ESC	2	0	2	0	3	2023

i) COURSE OVERVIEW:

Aim of the course is to enable the student to effectively perform technical communicationthrough graphical representation as per global standards. The student will be able to applythe principles of projection and will be introduced to the fundamentals of Computer AidedDrawing (CAD).

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Construct the orthographic projection of points and lines located in different quadrants.	Apply
CO 2	Prepare orthographic projection of solids by visualizing them in different positions.	Apply
CO 3	Prepare multiview projection and solid models of objects using CAD tools.	Apply
CO 4	Prepare assembly drawing of standard machine components using CAD tools.	Apply
CO 5	Construct drawings of engineering systems with CAD tools.	Apply

iii) SYLLABUS

Module 1

Introduction: Relevance of technical drawing, basic principles of engineering drawing, BIS code of practice for technical drawing, types of lines, planes of projection, orthographic projection of points in different quadrants. Projection of straight lines.

Module 2

Orthographic projection of regular solids. Introduction to section, development, isometric and perspective projection

Module 3

Introduction to Computer Aided Drawing, sketching of simple 2D geometries, editing and dimensioning of 2D geometries, creating 3D model using suitable software.

Module 4

Assembly drawing of machine components using suitable CAD software.Module

5

Plan and elevation of simple building with dimensions, electrical drawing and circuit drawingsusing suitable CAD software.

iv) a) TEXT BOOKS

v)   CONTINUOUS ASSESSMENT

Attendance	5 marks
CA Exams (CAT1 and CAT2)	10 marks each
Assignment	15 marks
Lab Work	5 marks
Lab exam	10
Total	**60 Marks**

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 40 marks with a duration of 2 hours.

.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESB10H	PROGRAMMING USING PYTHON	ESC	2	0	2	0	3	2023

i)   COURSE OVERVIEW:

The objective of the course is to introduce Python programming and develop programming skills to manage the development of software systems. It covers data processing in Python andintroduces Machine Learning and Artificial Intelligence-based applications and tools, Data Science and Data Visualization applications.

ii)   COURSE OUTCOMES

After the completion of the course the student will be able to:

CO 1	Apply the fundamental concepts and control statements in Python	Apply
CO 2	Illustrate uses of functions and data structures in Python	Apply
CO 3	Develop programs by utilizing the modules Lists, Tuples, Sets and Dictionaries in Python	Apply
CO 4	Develop programs using OOPs Concept	Apply
CO 5	Implement programs in Python using packages and Develop GUI for python programs	Apply

iii)   SYLLABUS

Basics of Python- Getting Started with Python Programming, Basic coding skills-Working with data types, Control statements, Selection structure , Iteration structure ,Functions, Python data structures: Lists , Work with tuples, Sets, Dictionaries, Strings and lists, Object Oriented Programming: Design with classes, Exceptions, Visualization and File handling modules in python -NumPy, matplotlib, pandas.

iv)   a) TEXT BOOKS

1) Kenneth A Lambert., Fundamentals of Python : First Programs, 2/e, Cengage Publishing, 2016Rajaraman, V.,Computer Basicsand CProgramming, Prentice-Hall India

2) David J. Pine, Introduction to Python for Science and Engineering, CRC Press, 2021

v)   CONTINOUS ASSESSMENT

Attendance	5 marks
CA Exams (CAT1 and CAT2)	10 marks each
Assignment	15 marks
Lab work	10
Lab exam	10
Total	**60 Marks**

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 40 marks with a duration of 2 hours.

.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESL10Q	DIGITAL ELECTRONICS	ESC	3	0	0	0	3	2023

i) **COURSE OVERVIEW**: The goal of this course is to impart an understanding of the basic concepts of Boolean algebra and digital systems. This course covers the design and implementation of different types of practically used combinational and sequential circuits. This course helps the learners to develop application level digital logic circuits to solve real lifeproblems.

ii) **COURSE OUTCOMES**

After the completion of the course, the student will be able to:

CO 1	Illustrate decimal, binary, octal, hexadecimal and BCD number systems, perform conversions among them and do the operations - complementation, addition, subtraction, multiplication and division on binary numbers.	Understand
CO 2	Simplify a given Boolean Function and design a combinational circuit to implement the simplified function using Digital Logic Gates.	Apply
CO 3	Design combinational circuits - Adders, Code Converters, Encoders, Decoders, Multiplexer, Demultiplexer and design the Programmable Logic Devices -ROM and PLA.	Apply
CO 4	Design sequential circuits - Registers, Counters and Shift Registers.	Apply
CO 5	Illustrate algorithms to perform addition and subtraction on binary and BCD numbers.	Understand

iii) **SYLLABUS**

Number systems, Operations & Codes: Various Number systems - its arithmetic operation - Number Base Conversions- Representation of negative numbers-BCD Arithmetic.

Boolean Algebra: Postulates- Basic theorems and properties of Boolean Algebra-Boolean Functions-Simplification of Boolean Functions-Don't care Conditions-Digital Logic Gates

Combinational Logic circuits: Design procedure & Implementation of Binary Adders and Subtractors- BCD Adder-Code Converters-Decoder- Encoder-Mux - Demux .

Sequential logic circuits: Flip-flops- Triggering of flip-flops- Master Slave flip-flops - Excitationtable and Characteristic Equation-Counter Design: Asynchronous & SynchronousCounters.

Shift registers: Shift register, Ring Counter- Johnson Counter
Arithmetic algorithms: Algorithms for arithmetic operations on Binary and BCD numbers.Programmable Logic Devices: ROM-Implementation of PLA.

iv)   a) TEXT BOOKS

v)   CONTINOUS ASSESSMENT

Attendance	5 marks
CA Exams (2 numbers)	10 marks each
Assignment	15 marks
Total	**40 Marks**

vi)   END SEMESTER EXAMINATIONS

There will be an end semester examination for 60 marks with a duration of 3 hours.

.

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23HSJ1NB	**Professional Communication**	HSC	2	0	0	2	1	2023

i) PRE-REQUISITE: Nil

ii) COURSE OVERVIEW:

The objective of this course is to equip students with the necessary skills to listen, read, write, and speak so as to comprehend and successfully convey any idea, technical or otherwise, as well as give them the necessary polish to become persuasive communicators. The course aims to enhance the employability and career Skills of students and orient the students towards grooming as a professional.

iii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Demonstrate effective language skills relevant to Engineering through writing and making presentations.
CO 2	Analyze, interpret and effectively summarize a variety of textual and audio content for specific needs
CO 3	Apply appropriate thinking and problem solving techniques to solve new case studies.
CO 4	Present and analyse a given technical/non-technical topic in a group setting and arrive at generalizations/consensus.
CO 5	Create professional and technical documents that are clear and adhering to all the necessary conventions.
CO 6	Manage and apply interviewing skills.

iv) SYLLABUS

Communication Skills: Introducing yourself and others professionally, elevator pitch, recommendation letter, e-mails, netiquettes, telephone etiquettes, demi-official letters. **Business Communication and Technical writing:** Product description, narrating an incident, report writing, agenda and minutes, memo, Asking for information and giving information, explaining processes and products, giving instructions, planning a course of action. **Creative Thinking, Critical Thinking Skills and problem solving:** Expressing opinion,

GD, Arguing, reading critical texts (general and academic) and summarizing, listening and responding, Negotiation strategies and decision making skills.

Presentation Skills: Oral Presentation Skills (Proposal presentation), PowerPoint presentation (Projects).

Interviews: CVs and Resumes, LinkedIn, Job application, Types of interviews, successful interviews, interview etiquette, dress code, body language, telephone/online interviews, one-to-one interview & panel interview, FAQs related to job interviews.

v) a) TEXT BOOKS

1. Meenakshi Raman and Sangeetha Sharma (2018). "Professional Communication", 3rd Edition, Oxford University Press, 2018

2. Meenakshi Raman and Sangeetha Sharma," Technical Communication: Principles and Practice", 2nd Edition, Oxford University Press, 2011

3. M. Ashraf Rizvi, "Effective Technical Communication". New Delhi: Tata McGraw Hill Publications, 2007.

(b) OTHER REFERENCES

1. English for Engineers and Technologists (Combined edition, Vol. 1 and 2), Orient Blackswan 2010.
2. Stephen E. Lucas, "The Art of Public Speaking", 10th Edition; McGraw Hill Education, 2012.
3. William Strunk Jr. & E.B. White, "The Elements of Style", 4th Edition, Pearson, 1999.
4. David F. Beer and David McMurrey, Guide to writing as an Engineer, John Willey. New York, 2004.
5. Goodheart-Willcox, "Professional Communication", First Edition, 2017. 6. Training in Interpersonal Skills: Tips for Managing People at Work, Pearson Education, India, 6 editions,2015.
7. The Ace of Soft Skills: Attitude, Communication and Etiquette for Success, Pearson Education; 1 edition, 2013.
8. Anand Ganguly, "Success in Interview", RPH, 5th Edition, 2016.
9. Raman Sharma, "Technical Communications", Oxford Publication, London,2024

vi) COURSE PLAN

Module	Contents	No. of hours

I	Need for Effective Communication, Levels of communication; Flow of communication; Use of language in communication; Communication networks; Significance of technical communication, Types of barriers; Miscommunication; Noise; Overcoming measures **Non-verbal Communication and Body Language:** Forms of nonverbal communication; Interpreting body-language cues; Kinesics; Proxemics; Chronemics; Effective use of body language **Technical Writing:** Differences between technical and literary style, Elements of style; Common Errors, **Letter Writing:** Formal, informal and demi-official letters; business letters, Netiquettes: effective mail messages	8

II	Need for Creativity in the 21stcentury, Imagination, Intuition, Experience, Sources of Creativity, Lateral Thinking, Myths of Creativity Critical thinking Vs Creative thinking, Functions of Left Brain & Right brain, Convergent & Divergent Thinking, Critical reading & Multiple Intelligence. Steps in problem-solving, Problem-Solving Techniques, Problem Solving through Six Thinking Hats, Mind Mapping, Forced Connections.	12

	Problem Solving strategies, Analytical Thinking and quantitative reasoning expressed in written form, Numeric, symbolic, and graphic reasoning, Solving application problems.	
III	Reading, Comprehension, and Summarizing: Reading styles, critical reading, reading and comprehending shorter and longer technical articles from journals, newspapers Listening Skills: Active and Passive listening, listening for general content, to fill up information, intensive listening, for specific information, to answer, and to understand. Developing effective listening skills, barriers to effective listening, listening to longer technical talks, listening to classroom lectures, talks on engineering /technology, listening to documentaries and making notes, TED talks. Telephone etiquettes	10
IV	Oral Presentation: Voice modulation, tone, describing a process, Presentation Skills: Oral presentation and public speaking skills, business presentations, Preparation: organizing the material, self Introduction, introducing the topic, answering questions, individual presentation practice, presenting visuals effectively. Mirroring, Elevator Pitch Introducing Oneself -one's career goals	15

V	Formal writing and interview skills: Technical Writing: differences between technical and literary style. Letter Writing (formal, informal and semi formal), Job applications, Minute preparation, CV preparation (differences between Bio-Data, CV and Resume), and LinkedIn profile. Statements of Purpose, Instructions, Checklists. Interview Skills: types of interviews, successful interviews, interview etiquette, dress code, body language, telephone/online interviews	15
	Total Hours	60

i) Lab Activities

1. Activity: SWOT analysis
2. Activity: Creating LinkedIn profile, preparing CV, mock interview
3. Activity: Reading a technical paper and summarizing
4. Activity: Interpret data in tables and graphs
5. Activity: Writing a report
6. Activity: Oral presentation on the given topic using appropriate non-verbal cues
7. Case Analysis of a challenging scenario
8. Problem solving using mind map/six thinking hats

ii) Continuous Assessment

Attendance: 5 marks
Regular assessment
Project report writing:10 marks
Technical presentation through PPT :10 marks
Listening Test: 10 marks
Group discussion/mock job interview: 10 marks
LinkedIn submission: 5 marks
Case Study: 20 marks
Project:30 marks

Course Code	Course Name	Category	L	T	P	Credit	Year of Introduction
23CYP10A	ENGINEERING CHEMISTRY LAB	BSC	0	0	2	1	2023

i) COURSE OVERVIEW:

This course is designed to familiarize with the basic experiments in industrial chemistry and to accustom the students with the handling and analyzing chemicals and standard laboratory equipments.

ii) COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Use volumetric titration techniques forquantitative analysis of water.	Apply
CO 2	Use spectroscopic techniques for analyzing and interpreting the IR spectraand NMR spectra of some organic compounds.	Apply
CO 3	Use instrumental techniques forquantitative chemical analysis.	Apply
CO 4	Organize scientific experiments as ateam to analyze the results of such experiments.	Analyze
CO 5	Interpret experimental data by themselves to apply them to real worldproblems.	Analyze

iii) SYLLABUS

1. Estimation of total hardness of water by EDTA method.

2. Analysis of IR and ^{1}H NMR spectra of organic compounds.

3. Determination of wavelength of absorption maximum and colorimetric estimation of Fe^{3+} insolution.

4. Determination of molar absorptivity of a compound.

5. Estimation of chloride in water by argentometric method.

6. Calibration of pH meter and determination of pH of a solution.

7. Potentiometric titration: Acid – base titration

8. Estimation of dissolved oxygen in water by Winkler's method.

iv) b) REFERENCES

v)   CONTINOUS ASSESSMENT

Attendance	:	5 marks
Classwork / Assessment / Viva-voce	:	55 marks
Written Examination	:	40 marks
Total	:	**100 Marks**

vi)   END SEMESTER EXAMINATIONS

Nil

Course Code	Course Name	Category	L	T	P	J	Credit	Year of Introduction
23ESB10P	Manufacturing and Construction Practices B	ESC	1	0	2	0	2	2023

i)   COURSE OVERVIEW:

- This subject for exposing the students to the various theoretical and practical aspects of, manufacturing processes and familiarize various tools, measuring device, practices and machines used in workshop section.
- The goal of this course is to introduce the students to the field of Civil Engineering and itsimportance in the development of the Country. The course is designed to have lecture sessions on an introduction to the various fields of Civil Engineering and different aspectsof construction. The workshop session will provide hands-on experience in certain construction-related activities including surveying and levelling.

ii)   COURSE OUTCOMES

After the completion of the course, the student will be able to:

CO 1	Explain the basic manufacturing, metal joining and machining processes	Understand
CO 2	Demonstrate general safety precautions in different mechanical workshop trades.	Understand
CO 3	Prepare simple models using fitting, carpentry, sheet metal, welding and 3D printing techniques.	Apply
CO 4	Identify the tools and equipment used in fitting, carpentry, sheet metal, welding and various machine tools.	Apply
CO 5	Explain the various disciplines of Civil Engineering and its relevance in the development of the nation.	Understand
CO 6	Explain the different structural elements of a building and the building rules and regulations.	Understand
CO 7	Apply engineering principles and tools to set-out a plan, estimate the area and profile of plots, and construct masonry wall.	Apply
CO 8	Examine the quality of different building blocks.	Apply
CO 9	Make use of plumbing tools to install fixtures like tap, T-Joint, elbow, bend etc.	Apply

iii)   SYLLABUS

PART-I MECHANICAL

Module 1: Introduction to Workshop practice: Workshop practice, shop floor precautions, ethics and First Aid knowledge. Studies of mechanical tools, components and their applications: Tools: Screw drivers, spanners, Allen keys, cutting pliers etc. and Accessories

Module 2: Sheet Metal–Sheet metal forming, Sheet metal cutting, Forging, Rolling, Extrusion. Welding– Elementary ideas of joining process-welding, soldering and brazing. Fitting–Study of tools, Practice in filing, cutting. Male and female joints. Carpentry– Study of tools and joints. Practice in planning, chiseling, marking and sawing.

Module 3: Machine Tools (Basic elements, Working principle and types of operations), Lathe, Drilling Machine, Shaper, planer, slotter, Milling Machine, Grinding machine Machining processes: turning, taper turning, thread cutting, shaping, drilling, grinding, milling. Introduction to CNC and 3D Printing.

Practicals:

1. Machine shop

iv)   a) TEXT BOOKS

3) Rao P.N., "Manufacturing Technology", Vol. I and Vol. II, Tata McGraw HillHouse, 2017.

PART-II
CIVIL

Module 1: General Introduction to Civil Engineering: Relevance of Civil Engineering in the development of the nation. Brief introduction to major disciplines of Civil Engineering: Surveying, Structural Engineering, Geotechnical Engineering, Hydraulics & Water Resources, Transportation Engineering, Environmental Engineering, Construction planning & Project management, GIS.

Module 2: Structural elements of a building: Foundation, plinth, lintel, masonry wall, column, beam, slab, sunshade, parapet, staircase. Plinth area, built up area, carpet area, floor area ratio. Permission plan of a building – Demonstration. Building rules and regulations: NBC, KBR & CRZnorms.

Module 3: Surveying: Principles, instruments used. Levelling: Principles of levelling using dumpylevel - simple levelling, differential levelling. Demonstration of Total Station. Brick masonry – Types of bonds, Masonry arches, number of bricks for construction, other types of building blocks. Construction materials – cement, mortar, concrete. Plumbing tools. Types of roofs, Flooring materials

Practicals:

1. Compute area of a given plot using tape, EDM etc.

2. Levelling – Plot the longitudinal section of a road.

3. Setting out of a building: Set out a building as per the given building plan. Each groupcan set out one or two rooms of the building.

4. Construct a wall of height 50 cm and wall thickness 1½ bricks using English bond (Nomortar required) – corner portion – length of side walls 60 cm

5. Cast paver blocks using mortar and test for strength (Include sustainable materials also)
