PRINCIPAL'S MESSAGE

Sir C. V. Raman was a renowned Indian physicist whose work had a profound impact on the field of Science. Born on November 7, 1888, in Tiruchirapalli, Tamil Nadu, Raman was awarded the Nobel Prize in Physics in 1930 for his ground breaking discovery of the Raman Effect, which explains how light scatters when it passes through a material, revealing information about its molecular structure. This discovery has led to numerous applications in Chemistry, Biology, and Materials Science, helping scientists analyse molecular structures. Raman was a key figure in establishing India as a centre for scientific research and education. His achievements continue to inspire young scientists in India and around the world. Considering his contributions to science, **Sir C. V. Raman** was recognised as a fellow of the Royal Society of London in 1924. He was awarded with the Bharat Ratna, India's highest civilian honour, in 1954. Let's celebrate **Sir C.V. Raman's** legacy by embracing Science and Innovation, and fostering scientific research.
