PRINCIPAL'S MESSAGE

It is reported that tobacco use remains a leading cause of preventable death worldwide, contributing to various types of cancers, heart disease, and respiratory illnesses, claiming over 8 million lives annually. World No Tobacco Day, established by the World Health Organization (WHO), is observed annually on 31 May to raise global awareness about the deadly health risks associated with tobacco consumption and to advocate for effective policies to reduce its use. It highlights manipulative industry tactics and promotes the right to a healthy life. This year, the theme for World No Tobacco Day is "Unmasking the Appeal - Countering Nicotine and Tobacco Addiction". The World Health Organization campaign focuses heavily on exposing the deceptive marketing and design strategies used by the tobacco industry to attract a new generation of users, particularly adolescents and children. As responsible citizens, all of us have to play an active role in the campaign against the use and promotion of tobacco and its associated products, and create awareness about the harmful effects of tobacco usage and addiction.
