

PRINCIPAL'S MESSAGE

An invaluable gift of ancient Indian tradition, Yoga has emerged as one of the most trusted means to boost physical and mental well-being. Yoga is a core component of the Indian Knowledge System (IKS), representing a holistic approach to living a quality life. Rooted in ancient scriptures like the Vedas and Upanishads, yoga, particularly as systematised in Patanjali's Yoga Sutras, offers a path to self-realization and inner harmony. Yoga practices encourage ethical behaviour and mindfulness, fostering a positive impact on individuals and society. Yoga has been shown to be effective in managing chronic pain conditions like back pain, neck pain, and arthritis. It can help lower blood pressure and heart rate, potentially reducing the risk of heart disease. Yoga can help improve balance, flexibility, strength, and mobility, while also supporting mental well-being and stress management. Because yoga can be adapted to different fitness levels and health conditions, it offers an accessible way for many older adults to maintain their physical and emotional health. This year marks the 12th International Day of Yoga with the theme "Yoga for Healthy Ageing", which emphasizes the importance of Yoga for all ages. Let us join hands in practicing and promoting yoga for the benefit of one and all.
